- E. General Identification of Principal Argument Discussed
Applicants submit that their proposed claims are patentable over the prior art of record because such art fails to disclose, teach or otherwise suggest an article of manufacture having a bar code where the article itself comprises at least part of the bar code, a bar code comprising variable information, or a flexible article having a bar code, as claimed and described in Applicants' specification.
- F. Other Pertinent Matters Discussed
None.
- G. Results of Interview
Although the Examiners agreed in principle with the above argument, no agreement was reached at the time of interview, as the Examiners requested time to review Applicants' arguments in view of the cited art.
- H. Copies of Internet E-mail, if Conducted via Email
None.

CONCLUSION

Applicants submit that the above constitutes a complete, written statement as contemplated by 37 C.F.R. 1.133 and MPEP § 713.04. Applicants respectfully request this paper to be made of record in the above-identified application. The Examiners are requested to contact the undersigned if they have any questions.

Respectfully submitted,
